The route is made across the Sierra Norte de Guadarrama is perfect for mountain hikes, only drawback are some steep sections, where prudence is advised. Although it may be covered on foot, virtually all the route is paved. From the EI Espinar Station to the town of Ayllón, along the better part of the Cañada Real Sorianal Occidental drover's way across the province of Segovia, from West to East, from the EI Espinar Station to the town of Ayllón. Since 1969 the Ministry for Agriculture, Fisheries, Food and the Environment's Nature Trail is part of the Cañada Real Occidental Nature Trail and the trip. In this brochure you will find a brief description of the route, the itinerary and beauty of our precious natural heritage, and diversity and beauty of our traditions and people that are part of the unique landscape of our country.

We invite you to visit them and offer you the keys to enjoy the most of this experience. We only ask one thing of you: map for the journey, a day with communities to make the Cañada Real Occidental Nature Trail and the route former transport infrastructures such as railway tracks, diversity to the villages, sights, traditions and people that are part of the unique landscape of our country.

These routes take us to the countryside and to the biomes, cattle trails and traditional routes, for public use and discovery the villages, sights, traditions and people that are part of the unique landscape of our country.

# CANADA REAL SORIANA OCCIDENTAL.

### Stage 0: Estación de El Espinar-El Espinar

- 7-km stage that joins Estación de El Espinar, the small neighbourhood where the train station is located, and the town of El Espinar. The way runs along the course of the River Gudilllos until it turns towards the town of El Espinar near the Colada de la Soledad.

### Stage 1. El Espinar-Otero de Herreros

- This stage, which runs over 13 km, starts by leaving behind the town of El Espinar. Before descending to the course of the River Moros, the path crosses a gate and accesses the Cañada Real Sorianal Occidental drover's way, whose tracing it will follow across the entire province of Segovia. After leaving behind the town of Los Ángeles de San Rafael, which is a main communication hub, and crossing the Sierra del Quintanar at a mid-slope level, the stage finishes when it reaches the Otero de Herreros Station.

### Stage 2. Otero de Herreros-Embalse del Pontón Alto

- From Otero de Herreros, the path encounters several rivers (Milanillos, Peces and Acebeda) and creeks (Viboras, Pedrona, Pedriza, Fuentecillas,...). The trail runs at mid-slope level across the Sierra de Guadarrama, allowing to enjoy its lush vegetation. This stage, which runs over 21 km, ends next to the dam of the Pontón Alto reservoir.

### Stage 3. Embalse del Pontón Alto - Collado Hermoso

- This stage spans almost 20 km, from the dam of the Pontón Alto reservoir to Collado Hermoso. The narrow bridge of Merinas, the Rancho de la Marquesa and

the The Descansadero de Torrecaballeros, a traditional resting area for herds, are tokens of a century-old transhumance tradition in the area. Before reaching the end of the stage in Collado Hermoso, a visit to the pretty village of Sotosalbos is well worth a visit.

### Stage 4. Collado Hermoso-Navafria

- A short stage just under 10 km where the Cañada Real Sorianal Occidental drover's way runs towards the N-110 road and which ends in the natural pool formed in the waters of the Cega River in the pretty village of Navafria.

### Stage 5. Navafria - Arcones

- This fifth stage, which runs a little over 14 km, takes from Navafria to Arcones. The lush pastures and milstones such as the traditional resting area for herds of Descansadero de Gallegos and Descansadero Corral de la Mesta leave no doubt that the route runs along the Cañada Real Sorianal Occidental drover's road.

### Stage 6. Arcones - Villarejo

- The hardest stage of the trail without a doubt, this section runs above 21 km. The beautiful woods of Spanish juniper, Scots pine and, at the other side of the A-1 highway, the pastures and the woods of Pyrenean oak are well worth the effort. The town of Villarejo marks the end of this stage.

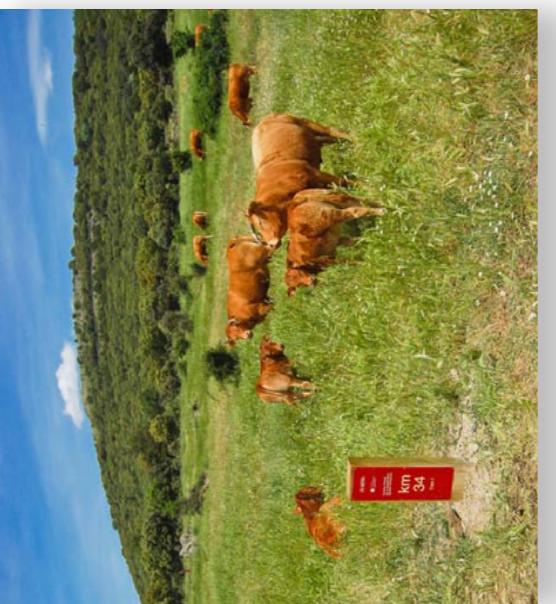

### Stage 7. Villarejo-Riaza

- In this 18 km seventh stage, the trail runs across Pyrenean oak and Scots pines from Villarejo to Riaza, leaving the ski resort of La Pinilla to the right before

reaching its final point in Riaza.

### CANADA REAL SORIANA OCCIDENTAL DROVERS' WAY

The Cañada Real Sorianal Occidental is a traditional cattle road used for centuries by herds of Merino sheep in their search for pastures. Today, all cattle roads are regulated by Act 3/95, of 23 March, on Drovers' road, and constitute imprescriptible, inalienable, unattachable goods, formally owned by Regional Governments. The most important among cattle roads are the type called drovers' roads, due to the fact that they are 75 m wide. In Spanish they are called "cañada real", the mention of "real" ("royal") having been granted by King Alfonso XI of Castile, due to the importance of these roads for the economy at the time. In current times, their use as cattle road has diminished and been complemented by other compatible uses, such as public and environmental uses. This drovers' way is one of the most important in the country.

## MOUNTAIN RANGES OF SEGOVIA BY THE TRANSHUMANCE

This Nature Trail covers almost 50 km divided in 8 stages, preceeded by a short "zero stage". This Nature Trail runs along the better part of the Cañada Real Sorianal Occidental drover's way across the province of Segovia, from West to East, from the EI Espinar Station to the town of Ayllón.

In their trip, the travellers will visit towns such as El Espinar, Otero de Herreros, Sotobrón, Collado Hermoso, Navfra, Arzobés, Villalejo, Riaza and Ayllón, and a large part of the route is paved, although some steep sections, where prudence is advised.

Although it may be covered on foot, virtually all the route is paved. From the EI Espinar Station to the town of Ayllón, along the better part of the Cañada Real Sorianal Occidental drover's way across the province of Segovia, from West to East, from the EI Espinar Station to the town of Ayllón.
